

Nucleus

RadioPharma

Job Title: MANUFACTURING TECHNICIAN
Reports to: Manager, Production
Classification: Full Time, Non-Exempt
Work Location: Rochester, MN - Onsite

ABOUT NUCLEUS RADIOPHARMA:

Founded by Mayo Clinic and Eclipse Ventures, Nucleus RadioPharma is a Contract Manufacturing and Development Organization built to ensure patients can access potentially life-saving radiopharmaceuticals through technologies to modernize the clinical development, manufacturing, and supply chain of these promising new treatment tools.

POSITION SUMMARY:

The **Manufacturing Technician** will be expected to perform all tasks associated with formulation, preparation, assembling, and packaging of components, according to cGMP Guidelines to meet production demands. The Manufacturing Technician will have advanced knowledge of the manufacturing process and serve as one of several lead technicians while coordinating work within the standard operating procedures (SOP's).

PRINCIPAL RESPONSIBILITIES:

- Follows quality, safety, regulatory guidance and written procedures.
- Perform batch record calculations and maintain all documentation according to cGMP guidelines.
- Performs the maintenance and cleanliness of department, premises, and equipment on a daily basis.
- Follow detailed instructions and communicate effectively, both written and verbally.
- Performs documentation in accordance with cGMP guidelines.
- Participate and perform effectively in a team environment and interact with multiple departments to ensure the operational success of the area.
- Set up, operate, monitor, and clean production equipment and processes in accordance with cGMP's and SOP's.
- Ensures internal / external customer expectations are met or exceeded.
- Capable of adjusting to changes and dealing effectively with uncertainties in the workplace.
- Takes initiative to achieve work goals and quantifiable business results.
- Collaborative attitude for business success.
- Demonstrates willingness to be flexible to the needs of the department and business.
- Perform other job-related duties as assigned.

QUALIFICATIONS:

- Associate degree or equivalent military experience. College level course work with scientific background is highly desired.
- One or more years of relevant work experience is required, preferably in a pharmaceutical or cGMP manufacturing industry.
- Good interpersonal skills and ability to communicate information in a timely manner.
- Takes ownership and accountability for the production process, assigned production area, and associated documentation.
- Must be capable of providing front line troubleshooting of manufacturing equipment and process issues, properly elevating concerns and issues to appropriate personnel.
- Aseptic processing and technique experience preferred.

KNOWLEDGE, SKILLS, ABILITIES:

- Willingness to work in a facility handling radioactive materials and requiring all employees to participate in safety programs designed to minimize potential and/or actual exposure levels.
- Mechanical aptitude required; manual dexterity for manipulating small items; ability to lift up to 50 lbs. and to handle frequent crawling, stooping, crouching, and kneeling.
- Must be willing to wear a variety of personal protective equipment.
- Willingness to work in a team-based environment.
- May be required to sit or stand for long periods of time while performing duties.
- Must be able to work varying shifts including overnight and weekends.
- Excellent communications, interpersonal and collaboration skills, and ability to interact professionally with a wide range of individuals and organizations, internal and external.
- Ability to work independently with minimal direction, and drive deliverables through to completion by deadlines provided.
- Highly organized with strong attention to detail and commitment to high quality work.
- Ability to work in a collaborative manner; identify challenges and barriers and recommend resolutions.

This job description is a summary of the typical functions of the position, not necessarily an exhaustive or comprehensive list of all possible position responsibilities, tasks and duties. The company reserves the right to assign or reassign duties and responsibilities to this job at any time. This job does not constitute a written or implied contract of employment; employment remains "at-will".

Nucleus RadioPharma is an equal opportunity employer and believes everyone deserves respect, dignity and equality. All applicants will be considered for employment without attention to race, color, religion, sex, sexual orientation, gender identity, national origin, veteran or disability status.
